Charging the Battery
in your EESiFlo 6000 Series
Portable Ultrasonic Flow Computer

1) Plug the wall mounted power supply into the rear of the 6000 Series input marked "9 … 12 VDC" then plug it into the nearest 110 VAC wall receptacle.

2) Turn the 6000 Series ON by pressing the ON (C) button

3) Navigate to the SF (Special Function) menu by pressing the 6 or 4 buttons

4) Navigate to "Charge Battery" by pressing the 2 or 8 button

5) Press the ENTER button and the 6000 Series will indicate how much time is required to charge the batteries.

6) Press the ENTER button again and the red LED next to BATTERY will light, and the LCD will display how many hours are expected to complete the charge.

7) Press ENTER again and the display will ask "Stop Charging" <NO> YES

8) Press ENTER to accept NO and the unit will return to the main menu of options and permit you to continue measurements.
